JavaScript	
Typescript	
React	
Ruby on Rails	
Ruby	
CSS3	
TailwindCSS	
NextJS	
Webpack	
Esbuild	
Git	
HTML & CSS	
Bootstrap	
MySQL	
Node.js	
Redis	
PostgreSQL	

## Profile

I am a Software Developer with more than a decade of experience building applications with JavaScript (using libraries like React) and Ruby on Rails

I also bring to the table extensive experience as a front-end instructor, where I've had the privilege of guiding individuals from various backgrounds. These range from beginners in programming to seasoned engineers boasting considerable expertise.

I am adaptable and able to work in collaborative and self-starting environments.

My commitment to transparent communication and consistent updates ensures alignment between stakeholders and engineers, facilitating project success.

## Employment History

### Full-Stack Software Engineer II, Able

AUGUST 2017 – MARCH 2024

As a Software Engineer at Able, I have been responsible for developing and maintaining modern and legacy software solutions built with Ruby on Rails and JavaScript. I collaborated with cross-functional teams to gather requirements, design and implement features, and ensure the successful delivery of projects.

During my time there, I:

- Launched one of the most active platforms for social justice allowing professionals to donate their time as part of the election processes.
- Worked on expanding and improving legacy codebases, based on newer requirements that allowed a client to raise funds and extend our contracts.
- Using React and Redux, implemented all views, integrating animations, audio cues and a custom-built video player for an unreleased new streaming device
- Developed internal tools that improved the company's employee management and review cycles.
- Contributed in a very large legacy project built in Ruby on Rails that allowed me to experiment with different kinds of solutions and to also refactor a lot of vanilla Javascript and improved my TDD skills with RSpec
- Interviewed both Engineering Managers and Software Engineers as part of the company's recruitment pipeline focused on the appraisal of front-end development skills and conflict management exercises.
- Performed the role of Scrum Master and Project Coordinator using agile methodologies to streamline development processes and meet project deadlines.

### Full-Stack Software Engineer, CodePicnic

MARCH 2015 – JUNE 2017

As a Full-stack Software Engineer at CodePinic, I was responsible for developing and maintaining web applications using JavaScript and Ruby on Rails. I collaborated alongside the CTO and CEO to develop their product from start to finish by gathering requirements, designing and implementing features, and ensuring the successful delivery of the product.

While working there I:

- Developed and deployed web applications using JavaScript and Ruby on Rails.
- First hire of the company

Jest

E2E Testing

Cypress

Remix

React Testing Library

## Languages

English

Spanish

- Supported the fundraising process
- Worked as part of the recruitment process of other Software Engineers
- Worked in the development of the product from start to finish

### Frontend Development Instructor, Area 51 Training Center, Lima

FEBRUARY 2017 – MARCH 2018

As Frontend Development Instructor I was responsible for mentoring a cohort of beginner students with no prior experience in coding, This includes students who worked in other industries (design, accounting, marketing, etc)

When I was working there I:

- Designed a comprehensive front-end curriculum tailored for three-month courses covering basic HTML, CSS, and Javascript, specifically crafted for marketing and design students
- Collaborated with fellow educators to assess student progress regularly
- Enhanced the front-end coding challenges to ensure ongoing improvement and relevance

### Front-end Development Instructor, Laboratoria, Lima

SEPTEMBER 2015 – JUNE 2016

As Frontend Development Instructor I was responsible for mentoring a cohort of beginner students with no prior experience in coding, equipping them with the skills necessary to succeed in the tech industry.

During my time at the BootCamp I:

- Crafted an extensive curriculum for one of South America's premier girl code boot camps, encompassing essential principles in web development and software engineering using HTML, CSS, and Javascript fundamentals.
- Assisted students in honing their soft skills and equipped them with the necessary preparation for their inaugural job interviews.

### Frontend Developer, Grupo Ingenia

SEPTEMBER 2012 – APRIL 2014

As a Frontend Developer and Grupo Ingenia I was responsible for developing features for different kinds of clients, most of them on the marketing side.

While working at this agency I:

- Worked on email implementation for different projects
- Developed animations for client websites
- Encouraged the company to work with Git to improve collaboration between software engineers and version control
